SHASHANK SINGH

Senior Backend Data Engineer

+91 7415223998 | shashank.singh751@gmail.com | LinkedIn | Website | Bangalore

EDUCATION

National Institute of Technology — Bhopal, India
B.Tech in Computer Science — 2018 – 2022

EXPERIENCE

Maersk — Bangalore, India
SDE-3 — 2025

- Engineered a **Databricks MCP AI Agent** to retrieve bill details for tracking and booking, enabling natural language queries and reducing manual lookup time by **85%** across customer support workflows.
- Built low-latency **ETL data pipelines** migrating data from **PostgreSQL** and **MongoDB** through **Kafka**, using **Flink** and **PySpark** to load into a new **Postgres** datastore with **<500 ms** end-to-end latency to **Databricks Analytics Dashboard**.
- Enhanced platform reliability with automated data quality controls and deployed **Databricks AI Agents with RAG** to accelerate incident detection, diagnosis, and resolution, reducing **operational incidents** and **MTTR** by **88%**.

JP Morgan Chase & Co. — Bangalore, India
SDE-2 — 2024

- Built a high-performance transaction processing system handling **2B+ daily records** using **Kafka, Spark Streaming, and Hadoop Batch Processing in HDFS**, improving analytics performance by **25%** and enabling fast ETL/ELT to **S3** and **Snowflake**.
- Created **25+ production-grade Airflow DAGs & Unix shell scripts** for Linux-based Hadoop workflows, improving job reliability and reducing processing incidents by **93%**, achieving **99.9%** pipeline uptime using **Control-M** job orchestration.
- **Mentored 3 interns** on workflows and debugging, accelerating onboarding and project contribution.

JP Morgan Chase & Co. — Bangalore, India
SDE-1 — 2022

- Managed five applications on **active-active DR servers**, improving failover speed by **30%** and maintaining **99.99% availability**.
- Developed **20+ Splunk alerts** and **Grafana dashboards** for critical monitoring, reducing downtime by **55%**.

JP Morgan Chase & Co. — Bangalore, India
Summer Intern — 2021

- Created a **Selenium-based YouTube view-bot** generating **500+ automated views daily** for internal testing and behavioral analysis.
- Developed an interactive **lending services prototype** using **AdobeXD**, reducing redesign cycles through iterative user feedback and agile methodology.

SKILLS

Java | Python | Linux | Databricks | AWS | Kafka | Spark | Postgres | SQL | NoSQL | Hadoop | HBase | Hive | Cassandra | Mongo | Snowflake | Bash | CDC | Splunk | Grafana | Big Data | Delta Lake | S3 | Redis | Jenkins | AI | ML | MCP | PuTTY | Kubernetes | Git

ACHIEVEMENTS

- AWS Cloud Certified (CLF-C01)
- Conducted 25+ tech interviews
- Zerodha Futures & Options Challenge Winner
- Won Code For Good Hackathon
- Qualified for Google Code Jam
- Qualified for Facebook Hacker Cup
- Inter School PowerPoint Competition: Rank 1
- Regional Mathematics Olympiad: Rank 7

PROJECTS

Panah Foundation - NGO

Python, Tkinter

- Developed an interactive **SMS application using Python and Tkinter** to send verification status updates to users, ensuring seamless communication.
- Built a web application for the NGO during a **24-hour hackathon,** demonstrating rapid development skills and the ability to **deliver under tight deadlines.**

Website

Next.js, React, Tailwind CSS, TypeScript

- **Developed a personal portfolio website** using **Next.js and Tailwind CSS,** achieving a 90+ Lighthouse performance score and reducing load time to under 2 seconds.
- **Deployed the portfolio on Vercel,** ensuring 99.9% uptime, mobile responsiveness across 10+ screen sizes, and improved SEO with a Google PageSpeed score of 90+.
